Welcome

Now that you have chosen your new home it's time to think about adding those finishing touches. A great way for your home to reflect your own personality is through custom made curtains and blinds from our Elegance and Indulgence Collections.

What will work best for you? What are the latest colour trends? Wouldn't it be wonderful to have a coordinated plan for all the rooms in your new home?

Here you will find a host of hints and tips that will help you make the right choices; from fabric selection and blending colour combinations to deciding what works best for particular rooms.

We have put this guide together with our partners from Designer Contracts. They have a great team of designers who specialise in new home interiors. They have a wealth of experience in creating stunning showhomes so they are aware of all the latest style trends. In short, they know what works!

So now's the time to be inspired! We've had great fun creating this guide and we hope you enjoy browsing through it.

Designed for you

Our range of made to measure curtains and blinds allows you to reflect your personality in your new home.

With our fabulous designs in modern colourways it is easy to achieve a tailored designer look with very little effort.

Managed for you

We offer a complete order to installation service. You can relax as we take care of everything. You don't even have to provide measurements.

All of our curtain and blind packages will normally be fitted prior to your legal completion.

Made for you

All curtains and blinds are custom made in our own workroom by highly skilled machinists who provide truly exceptional standards of workmanship.

All our curtains are fully lined and weighted.

All of our blinds are manufactured and fitted in accordance with current child safety legislation.

Unique to you

It's your home. With our curtains and blinds service we tailor everything to meet your needs.

Meet the interior designers

Our great team of designers give you some hints and tips on getting the best results for your home. These are only suggestions though, the beauty of our Elegance and Indulgence Collections is that you can mix and match to suit your own personal taste. Make sure you see our fabric books to get the full picture of the wide range of options available and a true guide to specific colours.

"If you are dressing a window in the **hallway or on a landing** which are often smaller, a roman blind will offer a tailored finish as well as being practical. Fitting roman blinds outside the recess in line with the sill allows more natural light and does not obstruct the window"

"In your **lounge and main living areas**, we suggest full length curtains with eyelet heading fitted onto a metal pole. This can create a luxurious and modern look. Cushions can add warmth and personality to a room, why not co-ordinate your cushions with your curtains"

"In **kitchens, family, dining areas, bathroom, ensuites and dormer windows**, we find that blinds are the most popular. They give a streamline, fresh look to the room and are easy to keep clean. You could also consider fitting perfect fit blinds to your patio doors. These are practical as they are fitted to the door, but create a contemporary look"

"In the **master bedroom**, why not treat yourself to full length curtains to create an opulent look. Another popular option would be to have curtains that fall just below the sill length, they will sit just above the radiator allowing for maximum heat circulation around the room. Please ask about blackout linings as they help block out the light, making them ideal for bedrooms."

Helping you keep everything looking great

After installation you will receive a copy of our care guide. It features lots of handy tips on keeping your curtains and blinds in the best possible condition.

"To **add more style to your rooms** you may also consider upgrading to pinch pleat or wave headings on your curtains. Pinch pleat curtains create an elegant look in your home, why not team this with a quartz pole (available as an optional extra). Wave headings create a modern and luxurious look as when they are fitted on a track they will hang from the ceiling to the floor"
